## Check if u have java

Run in your terminal:

`java -version`

If you see something like:

`openjdk version "21.0.3" 2024-04-16`

```
Microsoft Windows [Version 10.0.22631.5768]
(c) Microsoft Corporation. All rights reserved.

C:\Users\HP>java -version
openjdk version "21.0.8" 2025-07-15 LTS
OpenJDK Runtime Environment Temurin-21.0.8+9 (build 21.0.8+9-LTS)
OpenJDK 64-Bit Server VM Temurin-21.0.8+9 (build 21.0.8+9-LTS, mixed mode, sharing)

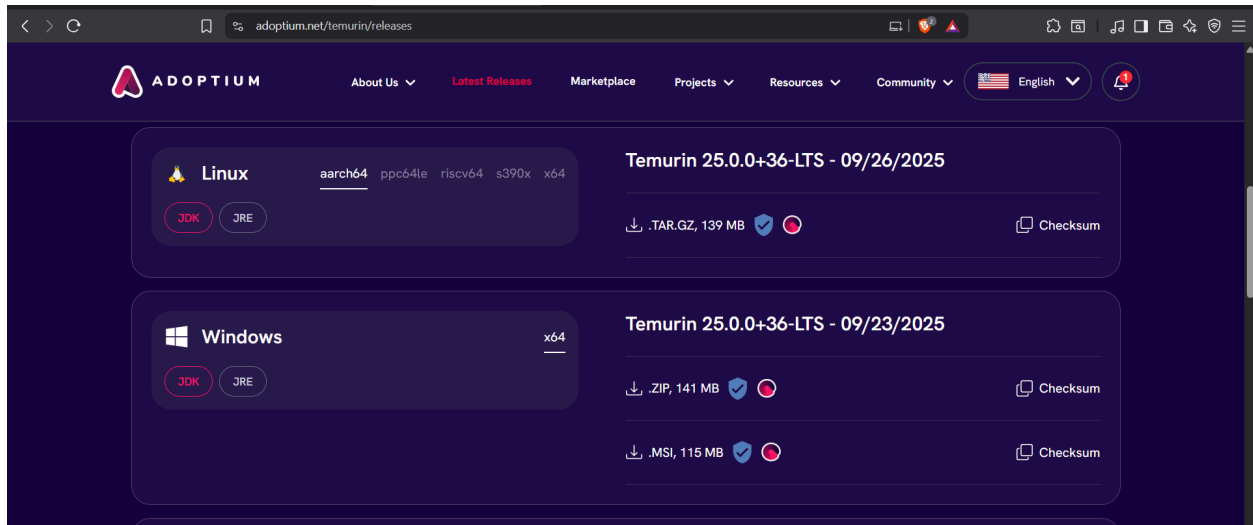

C:\Users\HP>
```

## install java

✅ If it shows something like `openjdk version "21.0.x"`, good.

❌ If not — install JDK 21 first from <https://adoptium.net/temurin/releases> before continuing.

scroll to this jdk one:

install .msi

## Download Maven

Go to <https://maven.apache.org/download.cgi>

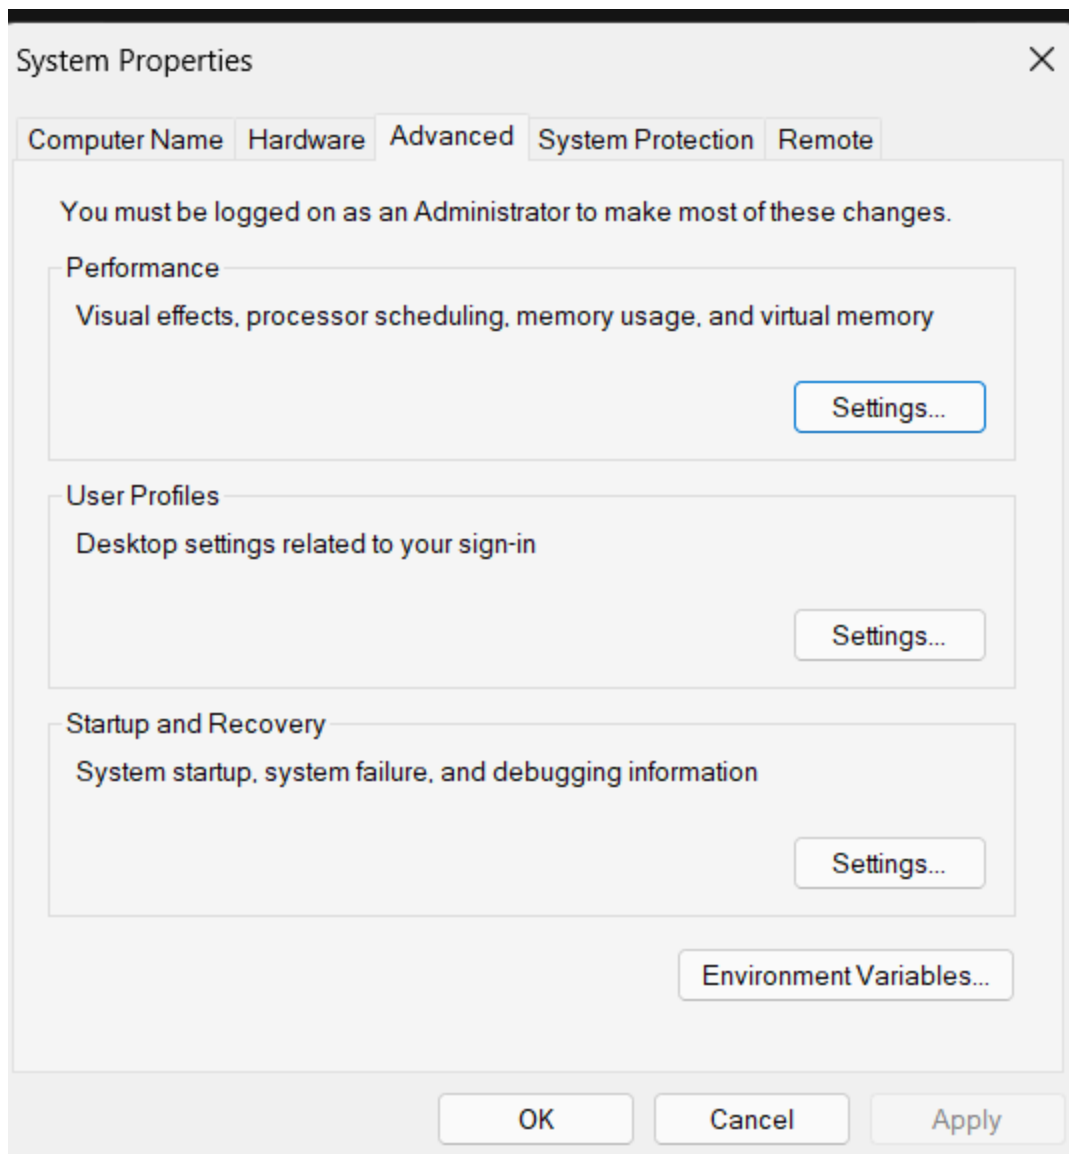

Download the Binary zip archive (e.g. apache-maven-3.9.x-bin.zip)

Extract it to a folder — e.g.

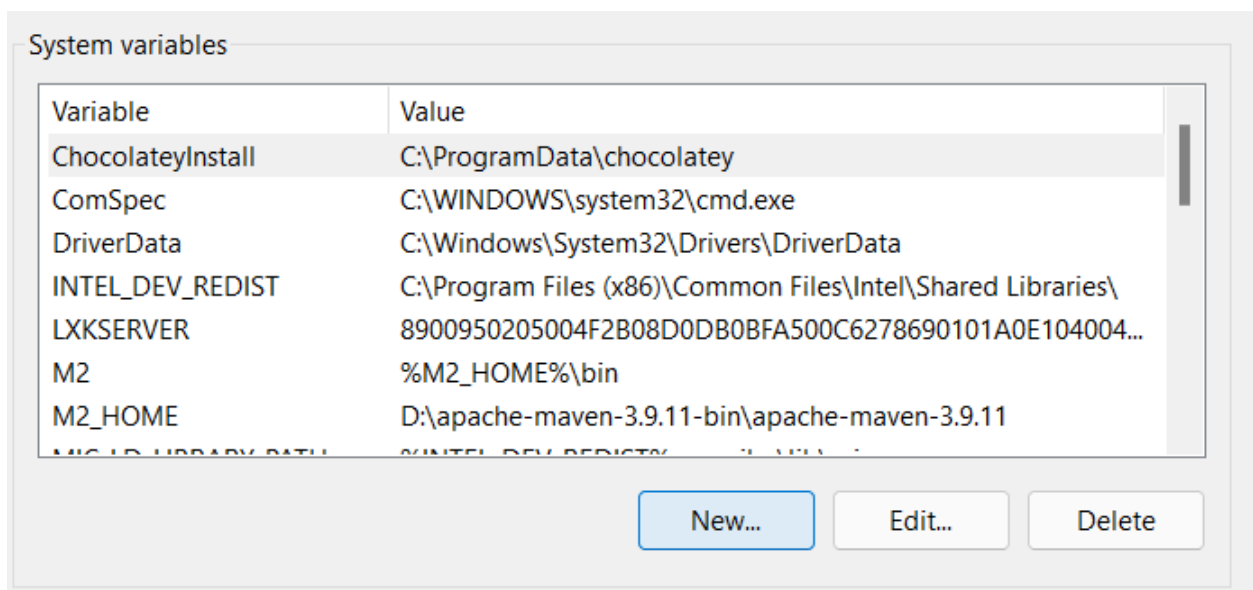

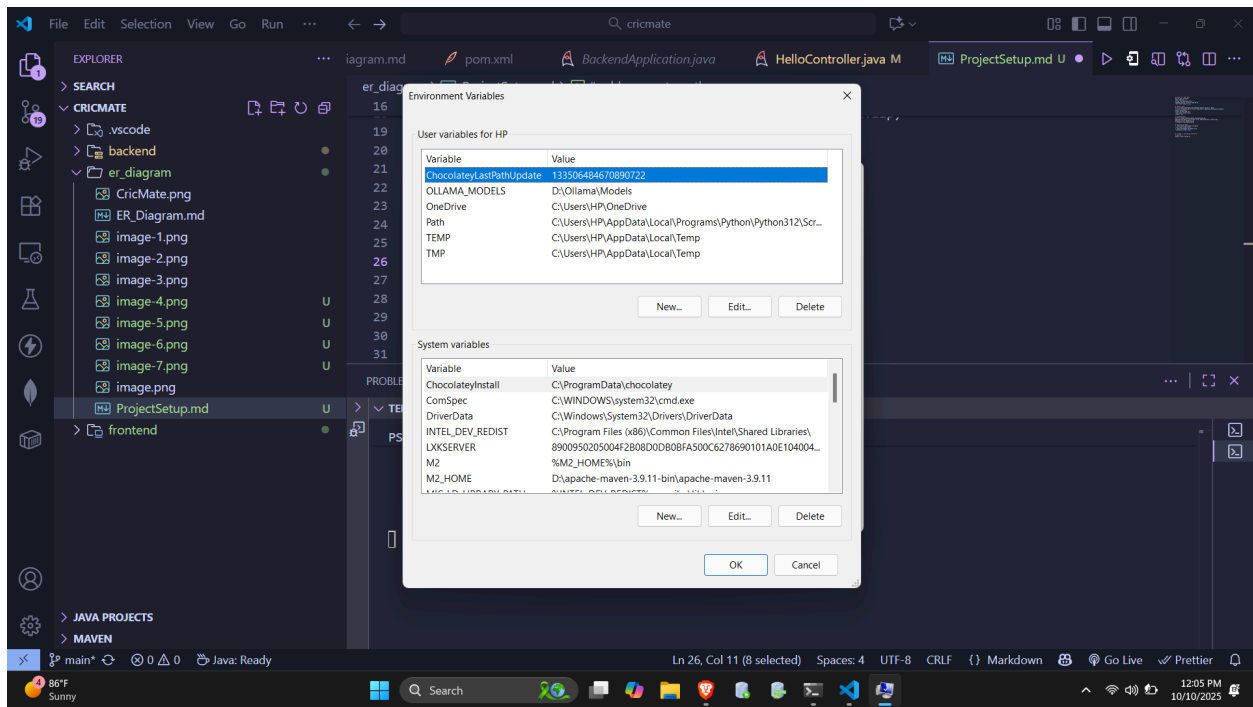

## note the folder where u extracted

## add maven to path

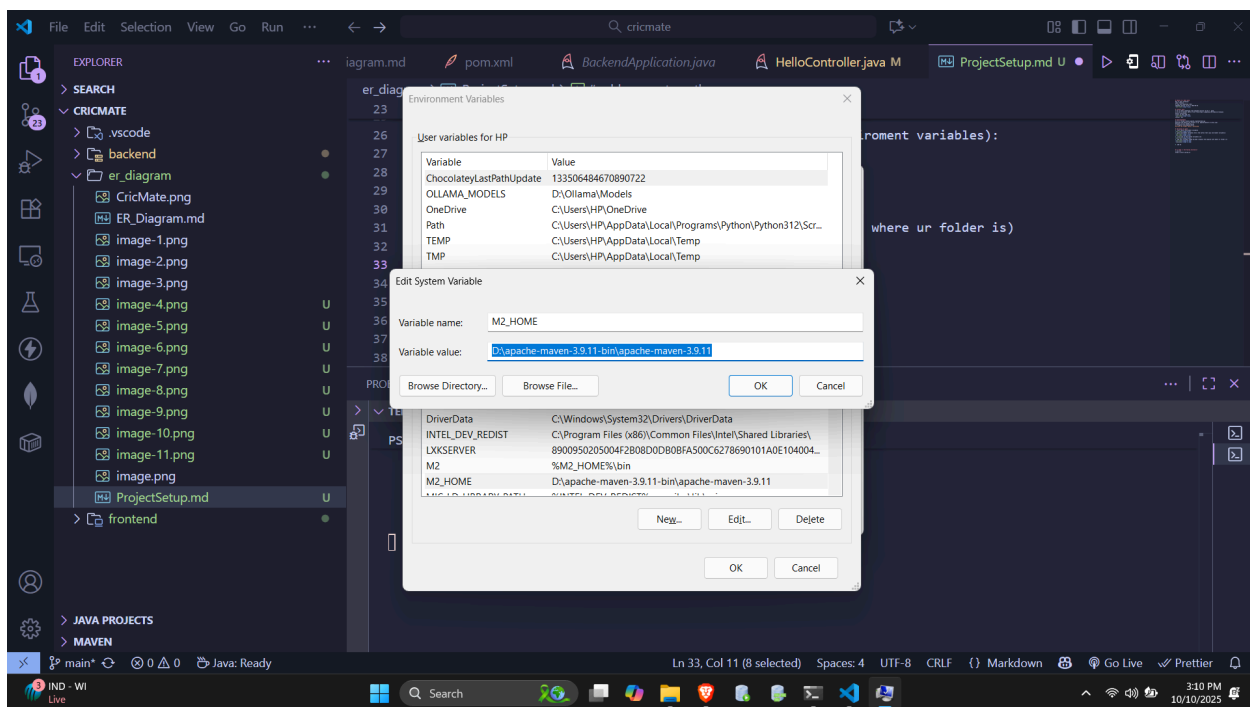

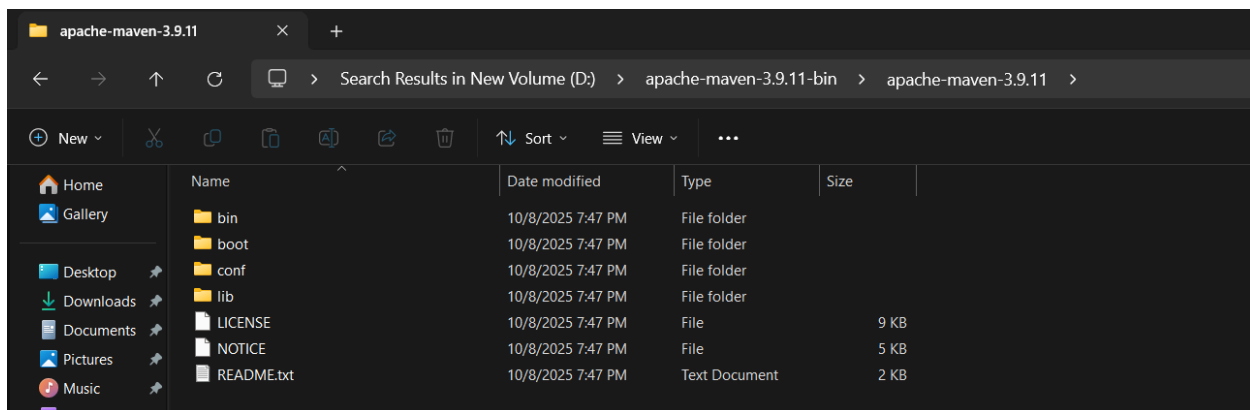

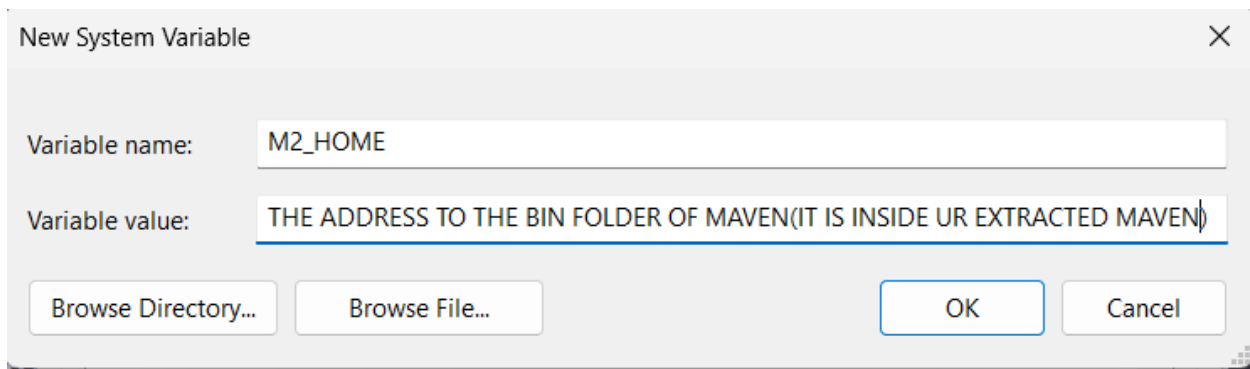

1. just search enviroment variables
2. goto enviroment variables here (the button that says enviroment variables):

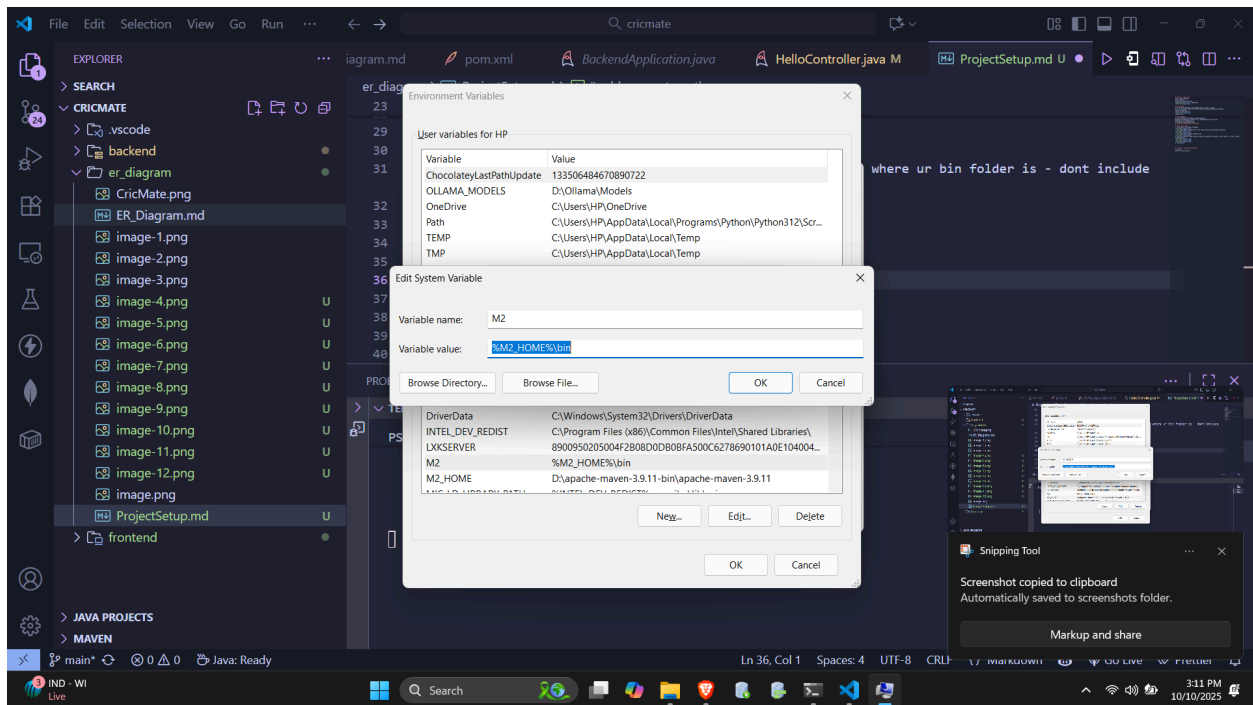

3. click new in the system variables one

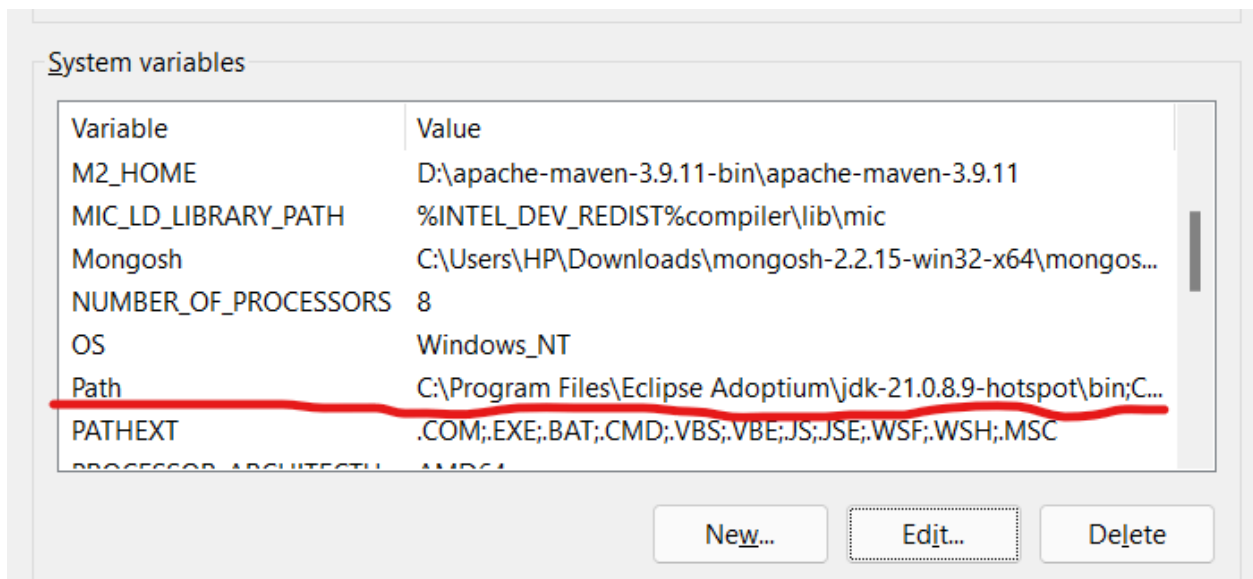

- add this variable named m2\_home (replace the english with where ur bin folder is - dont include the bin itself)

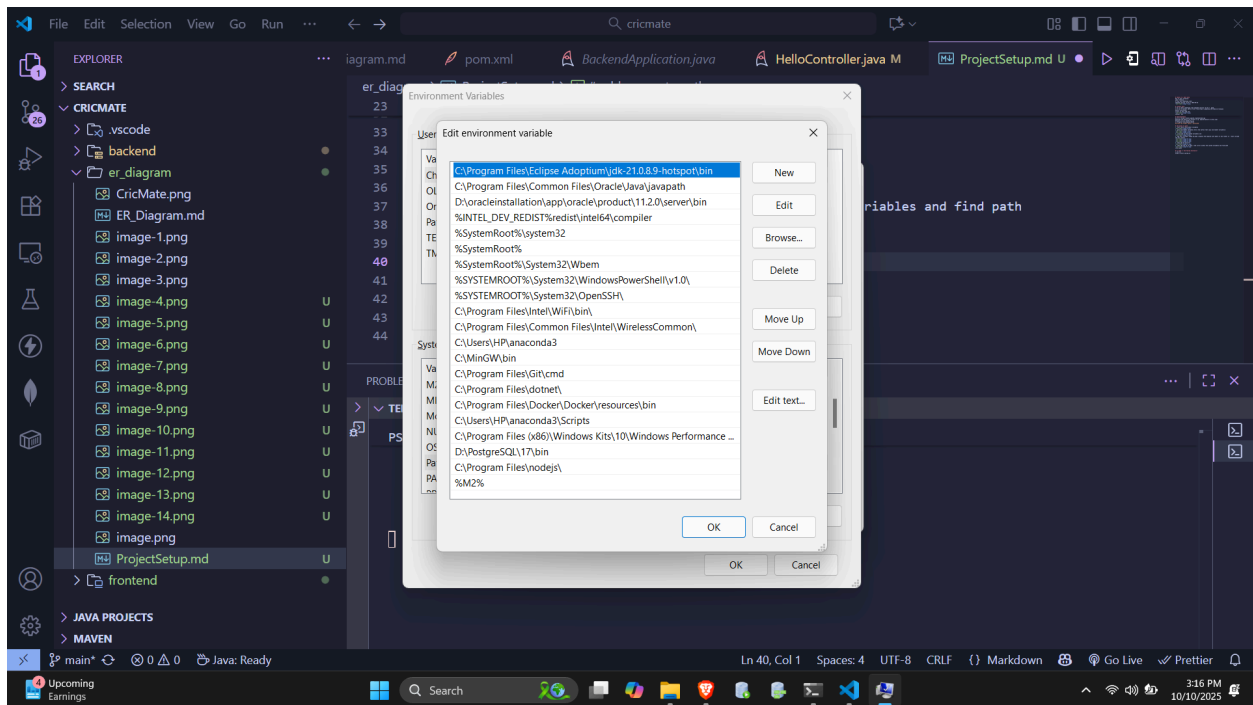

5. then add m2 with %%

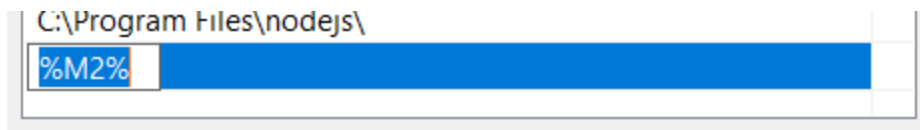

6. then add the m2 to path, like scroll within the system variables and find path click path

7. this opens:

8. click new and add

9. dont close windows, just do ok or apply on all windows and check mvn installation

10. Use Spring Initializr

👉 Go to:

<https://start.spring.io>
